**UPCOMING EVENTS**

Mid-South Duels - Donald Harrison  
Saturday, August 17, 2019 10:30 AM | TNGS Office 7779 Poplar Pike Germantown, TN

Let's Discuss It (August)

**Genealogy in the NEWS**

b) geographical areas, countries of ancestral origin, or common ancestral ethnicity; or

c) tools used in genealogical research, such as genetics or computer software.

The Tennessee Genealogical Society has formed two initial SIGs: DNA and Family Tree Maker (FTM). The groups will meet on a regular basis at the Society's office. Meetings will be informal with the group making decisions on topics and frequency of meetings. Our SIGs will be free and open to the public. There will be no formal membership, but the facilitator will maintain a list of participants.

DNA SIG

DNA testing is a tool that can be used, along with the paper trail of genealogical research, to open the door to new relatives, resolution of brick walls and confirmation of years of genealogical research. The goal of this group is to have members share successes and questions to increase the understanding of genetic genealogy within the group. Staying up to date on new tools used to analyze DNA results will also be a goal of this group. You are encouraged to bring your computers to allow specific issues to be more easily addressed. The DNA SIG will be facilitated by Deborah Atchley.

If you have any questions or comments, please contact the facilitator at <mailto:dnasig@tngs.org>
